DETAILED ACTION

Response to Amendment

1. The Amendment after Final Rejection filed on 12/04/2008 has been received and made of record. Claims 1 and 3-21 are pending in the application.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

As to independent claim 1, the prior art does not teach or fairly suggest an imaging device that outputs brightness information according to an amount of incident light, comprising a bypass transistor that is connected in parallel with the clamp capacitance, and brings the first output line and the second output line out of conduction not to bypass the clamp capacitance in a first case where a voltage applied between terminals of the clamp capacitance is in the predetermined range, and brings the first output line and the second output line into conduction to bypass the clamp capacitance in a second case where the voltage applied between the terminals is not in the predetermined range, and in combination with other elements.

The reasons for the allowance of independent claims 19, 20 and 21 are similar as it includes limitations similar to those of claim 1.

As to claims 3-18, these claims are dependent upon allowable independent claims and are thus also considered allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
